# Why Choose Raven?

Over the past 40+ years, customers have trusted Raven to meet their specialty construction film needs. Here are some reasons why:

## One-Stop Shop

Raven is your one-stop shop, where you can choose from a tremendous selection of in-stock products, including reinforced poly, vapor and gas retarders/barriers, weather protective barriers, and all the accessories to go along with them, in one call! When you buy from Raven, you can count on us to manufacture your order in house by extruding, laminating, and converting films from start to finish.

## Outstanding Service

At Raven, we put our customer first. Our experienced sales staff will handle your call courteously and efficiently, by providing a timely price quote including availability and freight cost to your location. We have dedicated marketing reps available to work directly with you and your staff to help with product training and project solutions.

## Custom Solutions

When you're looking for more than an everyday solution, just call Raven and we'll get the job done. We've custom designed polyethylene films for unique applications from start to finish, modified existing products, introduced new sizes and colors – you name it, we've done it!

## Competitive Prices

Our products are designed to provide a quality solution at a competitive price, giving you a cost-effective choice in your construction film needs.

## Quality Assurance

The core mission of every Raven employee is to deliver high quality service and products to construction supply professionals. Helping you make informed and accurate choices about the products you need is an objective that we all take very seriously.

## Enclosure Films

Raven building enclosure films are produced from quality materials resulting in durable, reinforced poly sheeting built to outperform the competition. **Dura♦Skrim**® is constructed with a high strength polyethylene film and heavy-duty scrim reinforcement, laminated together with a layer of molten polyethylene. **Dura♦Skrim**® is produced with a generous amount of reinforcement built in a uniform string pattern offering consistent tear resistance in all directions.

## Vapor Retarders/Barriers

Raven vapor retarders save time, money and energy by creating a barrier against moisture migration under concrete slabs and foundations, and through inner walls and ceilings. **VaporBlock**® is produced from state-of-the-art polyethylene resins for superior physical and performance properties. Our vapor retarders/barriers meet or exceed ASTM E-1745, Class A, B & C requirements.

### Need Recycled Content in your Barrier?

Contact us about **VaporBlock**® **G**™ to discuss your project requirements.

## Gas & Moisture Barriers

Raven gas and moisture barriers give you a line of defense in protecting your indoor environment by restricting radon, methane, and other harmful VOCs from migrating through concrete slabs and into your structure. **VaporBlock**® **Plus**™ is a seven-layer resilient underslab barrier built from premium resins with exceptional impact strength and superior resistance to moisture and gas transmission.

## Weather Protective Barriers & Flashing (Commercial - Residential - Stucco Building Wrap)

Raven has designed a weather protective barrier to meet the energy efficient needs of today's expert builders. **Fortress Pro**™ Weather Protective Barrier is a non-woven, non-perforated breathable building wrap with a unique layer of polyester fiber reinforcement for superior tear resistance and durability. **Fortress Pro**™ is designed to provide air and water holdout values second to none. See our complete **Fortress Pro**™ system designed specifically for use with the **Fortress Pro**™ building wrap including seaming tape and self-adhering butyl flashings.

## Concrete Curing Blankets

Raven wet curing blankets are designed to maintain hydration and inhibit moisture loss during the curing process of concrete. **Conkure**™ **Wet Curing Blankets** are lightweight and disposable providing a simple economical manner to flawlessly cure concrete.

Raven insulated curing blankets allow concrete crews to continue working well into the cold winter months. **Conkure**™ **Insulated Blankets** trap heat generated by the hydration of cement and insulate new concrete from cold temperatures.

## Accessories

From tie-down fasteners to field seaming tape, Raven Industries has the accessories you need to maximize your film's versatility and minimize installation time on the jobsite.

## The Raven Advantage

### Size is no problem.

Our 300,000 square foot South Dakota facility produces one of the widest ranges of size, material and thickness in the industry today.

### Complexity is no problem.

Raven has over 40 years experience in the flexible film manufacturing industry, and can provide a level of expertise in engineering and fabricating to meet even the most complex film requirements. Whether your need is simple or multifaceted, we can engineer a film for your toughest demands.

### Full service providers.

We can provide what you need, when you need it, including in-house custom printing. We're even equipped for full product testing in our internal state-of-the-art laboratory.

### ISO 9001:2000 certified.

We are committed to a high standard of quality customer service by adhering to the stringent guidelines of our ISO 9001:2000 certified management system to offer you the most comprehensive service possible.

## About Raven Industries, Inc.

We are a division of RAVEN INDUSTRIES, Inc., a manufacturer founded in Sioux Falls, SD in 1956 to produce high-altitude research balloons for N.A.S.A. From that single product line we evolved into a successful, diversified manufacturer publicly traded on Nasdaq (RAVN). Today's product lines are incorporated into three divisions including Applied Technology and Electronic Systems divisions and one wholly-owned subsidiary, Aerostar.

## We're Going Green!

To make sure we're being as environmentally friendly as possible, Raven Engineered Films is transitioning from print-based literature to digital literature. This means that our latest product data will be available online 24/7 at [www.rufco.com](http://www.rufco.com). We want to minimize waste and use our resources effectively. Please log on today to get our most up-to-date product literature. Thank you!
