

Raven Engineered Films Lists Construction Products On Construction Specifications Institute's GreenFormat™

Sioux Falls, SD (June 15, 2010) – Raven Industries Engineered Films, a provider of high performance flexible film and sheeting used in commercial, industrial or institutional building projects, announced today that its Underslab Vapor Barrier/Retarder materials; [VaporBlock®](#) and [VaporBlock® Plus™](#), and its Weather Restrictive Barriers; [Fortress™](#) and [Fortress Pro™](#) along with their Concrete Curing Blanket; [Conkure™](#) are now listed on the Construction Specifications Institute's **(CSI) GreenFormat**.

GreenFormat is a new, Web-based CSI format that allows building product manufacturers to accurately self-report the sustainable properties of their products through a comprehensive, online questionnaire. Their entries are then displayed in a standard manner through the *GreenFormat* Web site.

Architects, designers, engineers and other building professionals who make product-selection decisions can search the database at www.greenformat.com for free. It presents basic information on the green attributes of building products using an unbiased and consistent approach, helping save time for design, construction and operations professionals.

The product listings in *GreenFormat* are organized by *MasterFormat™* divisions in a specifications-friendly layout. The format's categories focus on topics that are important to design and product-selection decisions, providing basic information that helps design and building professionals find the right "green" products for their projects.

###

About Raven Industries: *Raven Industries was founded in Sioux Falls, SD in 1956, as a manufacturer of high-altitude research balloons for NASA and the American space program. From that single product line Raven has evolved into a successful, diversified manufacturer publicly traded on NASDAQ (RAVN). Raven Industries' Engineered Films Division has established a well-known reputation for manufacturing and supplying high-quality flexible films and sheeting to major markets throughout the United States and abroad. Their state-of-the-art manufacturing facility and proven product expertise allows them to offer the most innovative and targeted product solutions in the industry.*

About CSI

CSI is a national association dedicated to creating standards and formats to improve construction documents and project delivery. The organization is unique in the industry in that its members are a cross-section of specifiers, architects, engineers, contractors and building materials suppliers. The organization has 146 chapters and 14,000 members. Monthly Chapter meetings allow members the opportunity to communicate openly with their counterparts and exchange information for successful project management. CSI is renowned in the industry for its rigorous certification programs for professionals seeking to improve their knowledge of accurate and concise construction documents. CSI provides continuing education, professional conferences and product shows. For more information, visit www.csinet.org or call 800.689.2900.
